

## Plan for Saturday, 18 May 2013

Submitted by rutledge on Sat, 05/18/2013 - 09:41

Date:

Saturday, May 18, 2013 - 09:30

Discussion:

IFLOODS will resume full up operations at 7 PM local. No weather is expected in the IFLOODS domain until (roughly) 4-6 AM Sunday morning. We may see a mesocomplex approach IFLOODS from the west during this period, passing over the area through the mid-morning hours. After that the atmosphere will rapidly destabilize with the possibility of severe weather coming into the domain late Sunday afternoon into Sunday evening.
